

## How to choose the right size?

Take your body measurements according to the picture

A: Waist: measurement horizontally around the waist

B: Chest: measurement horizontally under the arms, around the widest part of the chest

C: Total body length: measurement from top of the head till the ground, to be measured without shoes

D: Inseam leg length: measurement from the crotch of the trousers till the ground, to be measured without shoes.

1. All measurements in the table are body measurements. We recommend that measurements are taken while wearing light clothing, do not measure too tight.
2. Find the correct size which corresponds with the body measurements in the table
3. If you would require a size which deviates from the sizes mentioned in the table, we are happy to manufacture such a garment according to your specific body measurements.

### Bodywear, thermal wear & rainwear

	<b>A: Waist (cm)</b>	<b>B: Chest (cm)</b>	<b>C: Total body length (cm)</b>
XS	66-74	78-86	164-172
S	74-82	86-94	164-172
M	82-90	94-102	172-180
L	90-106	102-110	172-180
